DATA SCIENCE INTERN

DATHAPPY | SEPT 2019 - MAR 2020

REMOTE

- I and my team worked on a Machine learning project that scans for vulnerability on a user's repository and sends a metric back to the admin
 - Collaborated with members of the team to build a pipeline to automate workflow from data cleaning to prediction.
 - cleaned and explored project data using Python and other data analytics tools like pandas, Seaborn.
 - I also helped in building the dashboard that shows the performance of our model over time
